Special Order Guidelines for 2026

Special orders for plants not on our regular catalogue list will be subject to the following criteria:

- **Minimum Orders for each special-order variety is 10 full flats of each variety**
- **You must supply all seed for special order varieties as follows:**

1000 seeds per ten finished 48-count flats

500 seeds per ten finished 18-count flats

- **All special orders and the seeds must be to us by January 1, 2026**

We search for the best varieties of every plant we grow and feel we provide an extremely large selection of all our flowers, vegetables, herbs, perennials, and native perennials.

We grow all our perennials and herbs in 18-count trays. Most of our customers prefer this size for its larger water-holding capacity, ease of maintenance, and larger root system.

NEW FOR 2026

SHADY NATIVE HARDY FERNS

Osmundastrum cinnamomeum-Cinnamon Fern

WOODY NATIVE SHRUBS

Amelanchier laevis-Allegheny Serviceberry

Website: www.glacialridgegrowers.com

We have been in the greenhouse business for over fifty-three years. It has always been our goal to bring quality, sustainably-grown plants at an affordable price to the retailer. We offer a wide variety of natives (flowers, grasses, sedges, and shrubs), perennials, annuals, herbs, vegetables, hanging baskets, fall mums, and a special selection of certified organic vegetable and herb plants. All perennials and herbs are grown in 18-count. Delivery is available or you can arrange to pick up your orders at the greenhouse. (SEE NEW ITEMS ON PAGE 2.)

Our “state of the art” greenhouse range allows us to remain on the cutting edge of production techniques. We have built a soil-handling room so we can use all bulk soil modules eliminating the need to use smaller, less eco-friendly 3 cubic foot bags of soil. We have also added additional greenhouse space to better serve our valued customers.

Jeremiah continues to administer integrated pest management in our greenhouses by using scheduled releases of predatory insects for control of pests. Correct timing, succession plantings, and precise regulation of growing temperatures and moisture keep our crop healthy and pest-free without the use of harsh chemicals. We use NO chemical insecticides, NO herbicides, NO growth retardants, and NO genetically modified seeds.

We are also very fortunate to have a reliable and diligent full-time staff to help with the production and shipping of our plants.

Gene Stark Muriel Stark Jeremiah Stark Barbara Gerdes Mamie Webber
Joshua Thompson Shanoa Feuchtenberger

“NO NICS” – STATE APPROVED BEE AND BUTTERFLY FRIENDLY

We are committed to production methods friendly to bees and butterflies. We use NO neonicotinoids in our greenhouse operation. We have also painstakingly researched our suppliers to get their assurance that they use no “neonics”. In addition, we offer the most extensive selection of pollinator plants available.

HOME OF GLACIAL RIDGE NATIVES

Here in west central Minnesota, among lakes and prairie marshland carved into the rolling countryside, we continue to grow and propagate plants that have resided here since before written history.

Ice and snow shaped and tilled the land preparing it for a diverse and stunning covering of grasses and flowers. The area became an ever-changing landscape, with four seasons of color and shimmering texture. The scale and grandeur of the wild prairie land inspired awe and wonder among the first explorers.

At Glacial Ridge we nurture the natives, producing the same handsome and hardy plants that have inhabited the prairies for centuries. We strive to bring back and restore the genetics of the past to insure the beauty and diversity of the future. Now everyone can experience a bit of what the early explorers to the Great Plains experienced. We are “RESTORING THE NATIVE PRAIRIE ONE BACKYARD AT A TIME.”

HOME OF GLACIAL RIDGE MINNESOTA HARDY PERENNIALS

We are also happy to offer you a wide variety of Minnesota Hardy Perennials. We have shady, sunny, and climbing perennials. These are offered in 18 count.

You can profit two ways with these Glacial Ridge Hardies:

- 1) Immediate sales of the 18 count perennials – Each pot is labeled for individual sales. Double your money by putting these plants directly into the sales area. We have a great selection of reasonably priced perennials for your customers. Run “full flat specials” for those who wish to start or fill a perennial bed.
- 2) Move into one-gallon pots. In about four weeks you can have a saleable perennial from an 18-count plant. Again, each plant is tagged. All you need are one-gallon pots and soil. Any plants remaining from your 18 count pots can be moved into one-gallon containers for summer or fall sales. Many of these perennials bloom the first season.

HOME OF PATIO PLANTS

These varieties have been selected for compact stature and high yields in small spaces. The plants marked “Patio” will perform well in containers and add beauty, flavor, and productivity to any patio or deck. Be sure to bring these items on board!

HOME OF GLACIAL RIDGE ANNUALS, HANGING BASKETS, HERBS, AND VEGETABLES

At Glacial Ridge we grow a wide and unique variety of annuals, hanging baskets, herbs, and vegetable plants. These plants are all individually tagged and ready to sell. Our herbs are grown as 18 count. Vegetables and annuals are grown both in 18-count trays and in paks

HOME OF GLACIAL RIDGE ORGANICS

Our organic transplants are USDA certified and come with an informative colored label. All these plants begin with certified organic seed. They are grown with our certified organic feed and pest management system in a separate organic greenhouse. Please contact us early if you have an interest in carrying our organic line.

GLACIAL RIDGE GROWERS, INC.

Over fifty-three years of greenhouse production has enabled us to refine our list to varieties that consistently sell well. Our plants are a tribute to a natural, harmonious life-style and thrive in our climate.

EARLY ORDER DISCOUNT

All orders placed by **January 1, 2026** will be booked with a 2% discount. All varieties are subject to availability. We will allocate plants on a first come – first serve basis.

PLEASE BOOK ALL PLANT ORDERS AS EARLY AS POSSIBLE TO ENSURE PLANT AVAILABILITY.

We look forward to helping supply your needs for the 2026 season.

All prices are subject to change.

DELIVERY

We can deliver your order or you may pick it up at our greenhouses. (Please call ahead for all pick-ups so that your order will be ready and waiting for you.) If you need a delivery please contact us for delivery costs and arrangements. During the peak season we do regular deliveries to the Twin Cities and surrounding areas.

FUNDRAISERS

We work with many groups that organize plant fundraisers. Please call us with questions that you might have about these fundraising opportunities.

PLEASE NOTE: CONTACT US before you put your order form together for your sale so that we can make sure that the plants that you wish to sell will be available for you. Order early. (We need a firm order for your group so that we can save those plants for YOU!) Also decide upon a delivery date now. Talk to us soon so that we can get that delivery date on our calendar.

If you are new to plant fundraisers, give us a call and we will discuss how you can be successful with a fun and profitable event.

FALL MUM FUNDRAISERS

Collect orders with your spring fundraiser order. We would like mum orders in by May. Mums will be delivered near the beginning of the school year in the fall. These big, beautiful mums are great for garden, deck, or pots.

WHOLESALE ORDERS

Wholesale orders must include an 8-flat minimum. Less than 8 flats per order will be subject to an upcharge. Orders that are delivered before June 1st must be full flats of one variety per flat. Orders that are delivered after June 1st may be mixed variety flats (depending upon plant availability).

POLLINATOR PAKS

Minnesota State Horticultural Society
A nonprofit organization
Growing Gardeners for 159 Years

MSHS wants gardeners to have easy options for planting pollinator gardens. Glacial Ridge Growers in Glenwood, MN is supporting this effort by growing pollinator plant variety market packs. Help MSHS by selling them to your customers – a \$3 donation per flat ordered is given to MSHS from Glacial Ridge.

These specially selected paks are designed to help your gardeners create habitat in their gardens for pollinators. There are **3 market pak collections: one for Bees, one for Butterflies, and one for Hummingbirds.**

These handy market paks with colorful handles are an easy sell for today's gardeners who are concerned about the challenges our pollinators are facing. **Each 6 pak has 6 different perennial plants** (most are natives) designed to attract a specific pollinator. Plus, they provide interesting color and texture to our sunny gardens.

Each flat holds 3 market paks of the same pollinator mixture. The plant mixtures have been carefully selected so that all six plants in a market pak have similar watering needs at your garden center. All of these market paks should be placed in a full sun location in your sales area.

- **For Bees:** Agastache foeniculum-Anise Hyssop; Baptisia australis-Blue Wild Indigo; Prunella vulgaris-Self-heal; Solidago rigida -Stiff Goldenrod; Pycnanthemum virginianum-Mountain Mint; and Ruellia humilis-Wild Petunia
- **For Butterflies:** Aster laevis-Smooth Blue Aster; Coreopsis lanceolata-Sand Coreopsis; Echinacea pallida-Pale Purple Coneflower; Liatris ligulistylis-Meadow Blazing Star; Liatris pycnostachya-Prairie Blazing Star; and Rudbeckia fulgida-Orange Coneflower
- **For Hummingbirds:** Aquilegia canadensis-Columbine; Heuchera-Firefly; Lobelia cardinalis-Cardinal Flower; Lobelia siphilitica-Great Blue Lobelia; Monarda didyma-Panorama Red; and Penstemon digitalis-Foxglove Beardtongue

Additional perk: MSHS will advertise that your business or group is selling the pollinator 6 paks.

Order directly from the grower: Glacial Ridge Growers in Glenwood, Minnesota.

Glacial Ridge Growers uses plant production methods that are friendly to bees, hummingbirds, and butterflies with NO Neonicotinoids and is known for growing quality natives, annuals, perennials, heirloom tomatoes, vegetables, strawberries, herbs and more.

Find more information at the MSHS website. www.northerngardener.org/pollinatorgardens
